EDUCATION

University of Massachusetts Lowell <i>Master of Science in Computer Science</i>	May 2025 – Dec. 2026 Lowell, MA
University of Massachusetts Lowell <i>Bachelor of Science in Computer Science, Minor in Mathematics</i>	Sep. 2021 – May 2025 Lowell, MA

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C/C++, C#, Kotlin, SQL, HTML/CSS
Frameworks: React, React Native, Expo, Node.js, Material UI, Jetpack Compose, Pytorch
Developer Tools: Git, Linux, AWS, Android Studio, npm, Vercel, MongoDB, Docker, Microsoft Office
Courses: Artificial Intelligence, Data Structures and Algorithms, OOP, Mobile App Programming, Cloud Computing

EXPERIENCE

Chapter President <i>Association for Computing Machinery at UMass Lowell</i>	May 2024 – May 2025 Lowell, MA
- Developed meetings for over 100 computer science majors by collaborating with seven executive board members - Increased meeting attendance by 40%, hosting guest speakers, reviewing resumes, and holding developer workshops - Improved team efficiency and meeting quality by discussing meeting topics and club finances with board members	
Executive Board Member <i>UMass Lowell Japanese Student Association</i>	Sep. 2022 – May 2025 Lowell, MA
- Developed meetings about Japanese culture by working with eight e-board members and other Asian culture clubs - Mentored new executive board members by showing them how to schedule meetings and create a budget - Participated in club events such as Night Market and Asian Night by collaborating with other Asian culture clubs - Posted announcements about the club's meetings on social media by partnering with the club's graphic designer	
Mobile Software Engineering Intern <i>Fidelity Investments</i>	Jun. 2024 – Aug. 2024 Merrimack, NH
- Designed and shipped three features to Fidelity's mobile app, used by over 5 million users - Implemented two UI features with Kotlin to help users view their retirement goals - Improved development efficiency by 20% by debugging Fidelity's internal REST APIs and fixing issues - Discussed my progress by participating in stand-ups, code reviews, and manager check-ins	
Software Development Intern <i>Whitehill Software</i>	Apr. 2021 – May 2021 Westford, MA
- Analyzed the company's Cardano cryptocurrency server through research and simulation of Cardano resources - Researched information about cryptocurrency through books such as The Bitcoin Standard - Presented my findings through flowcharts made with LucidChart	

PROJECTS

AI-CYREN Lab Website <i>React, JavaScript, MongoDB, Vercel</i>	Sept. 2025 – Dec. 2025
- Built a website for Dr. Claire Lee, PhD. and her research lab members using the MERN stack - Implemented the frontend by developing seven pages using React and Bootstrap - Configured hosting for the frontend, backend, and MongoDB database of the website by using Vercel - Improved team efficiency by 40% by communicating the addition of features with the client and team members	
Coderlingo <i>React Native, Expo, TypeScript</i>	Jan. 2025 – May 2025
- Created a mobile app to help students learn the C programming language - Implemented features such as learning modules and tab screens by using React Native and TypeScript - Analyzed app testability by performing user research for the app with second-year CS majors - Visualized app features by designing mockups for the app using Figma	
Budget Tracker App <i>Java, Android Studio</i>	Nov. 2024 – Dec. 2024
- Helped users manage their budgets by developing an app using Java - Displayed the user's purchases by implementing features such as a pie graph in Android Studio - Improved team efficiency by communicating the addition of features with other members of the team
